

Young Climate Warriors

How did the Clothing
challenge go?

Did sort through your clothes?

What actions did you take?
How did you give your clothes a
second chance?

'Feedback is the breakfast of champions'

Ken Blanchard, Leadership author and consultant

Brrr ... it's cold outside ... time for a nice hot drink ... and chance to tell us what you think!!

Whilst you're sipping or supping, please can you spare 2 minutes to give us some feedback via our short, quick questionnaire.

Your challenge - can you help make your parent or carer a hot drink (ask them first!) - but only boiling as much water as you need!

Time for experimenting ... how big are your mugs? Is there a measuring gauge on your kettle?

Kettles are 'energy guzzlers' and need a strong 'blast of energy' - reduce carbon emissions by reducing the amount of water boiled.

 YOUNG
CLIMATE
WARRIORS

When you've completed this challenge ... Remember to hit the red button!

- Many people boil several times more water than they need for each cup of tea. (3/4s of us, according to a 2021 government study!)
- During the 2020 UEFA EURO 2020 match – England vs Germany – there was a 1GW ‘pick-up’ in electricity demand at half-time – equivalent to 200m lightbulbs and 555,000 kettles!

Weekly
? CHALLENGE

BOIL
WHAT YOU
DRINK AND TELL US
WHAT YOU THINK!
Help your parent/carer
only boil the water you
need in the kettle, and
don't forget to fill in
our questionnaire!

Things to think about

Why do you think it's important to only boil the water you need and how can this help climate change?

What other ways can you think of to conserve energy while using kitchen appliances?

Why do you think there's a big surge in energy use after a popular TV show ends?

Help us build our Young Climate Warriors Story!

It's World Book Day this week and YOU are a key part of our story!

Please click on our [children's questionnaire](#) – it'll take you less than 3 minutes and listening to what YOU think is really important to us!

Thank you!
