

Newsletter text – Friday 24th May 2024

'If we change our perceptions and see the dandelion flower for what it is – an absolute lifeline to our bees in early spring – we might learn to love them more.'

#Morethanweeds, Founder – Sophie Leguil

Our half-term challenge is about wildflowers. Young Climate Warriors are encouraged to identify some of their local wildflowers, and plant a 'wildflower meadow in a pot'.

Wildflowers that have grown and evolved here in the UK for hundreds of years are struggling to adapt quickly enough to the impacts of climate change. Our beautiful wildflowers have evolved alongside our native wildlife and are a particularly attractive food source for our native pollinators.

Wildflowers — a vital source of food and shelter for our pollinators

Time to play, to relax, to let your mind wander, and time to notice the wild flowers?

They brighten the pavement, cheer up the brickwork, provide a splash of colour to the verges.

How many can you spot, what colours are they, how many petals do they have, do they smell nice? Take a photo, find out their names?

Can you grow a wildflower meadow in a pot at home?

Half-term challenge:
24th May
