

Young Climate Warriors

How did the
Upcycling
challenge go?

What did you create from
your rubbish?

'Climate change is already causing great harm. As our rains become less reliable and our reservoirs dry up, girls of my age spend more time fetching water for their families and less time in school.' Beatrice Caroline Phiri, Climate Change Ambassador, & youth reporter in Lusaka, Zambia.

Do we take water for granted? Are you up for a Bathroom Water Blitz?

Join in with this
Climate Action
Countdown challenge!

How much water do you reckon you use in a week? The UK average is 140 litres a day!!! Yet in Mali people have to survive on 11 litres a day.

A typical bath uses 80 litres of water. Join in with the Bathroom Water Blitz! Swap to a shower – as long as it's not super long – and save a huge amount of water.

What's your favourite 'sustainable showering songs' – just the right length to keep your shower nice and short. Share your top recommendation – #climateactioncountdown, #youngclimatewarriors

When you've completed this challenge ... Remember to hit the red button!

- The average individual in the UK uses 140 litres of water per day.
- A typical bath takes 80 litres. A dripping tap can waste 95 litres in a day.
- By 2040, the UN estimates that one in four children will be living in areas of extremely high water stress.
- Over 1.9 billion people rely on the water that flows from Himalayan glaciers – including for drinking, agriculture and energy.

Things to think about

Check out our Sustainable Showering Songs Playlist on Spotify!

Why do you think we sometimes take water for granted?

Do you have any idea how much water you use in a week? Could you try and work it out?

What do you think of this quote 'If climate change is a shark, water is its teeth' by James P Bruce, Meteorologist

Why do you think this might be the case?

What has climate change got to do with water?
