

Young Climate Warriors

How did the Walking and Talking Challenge go?

Who did you talk to and what things did you talk about?

Where did you walk to?

‘When it comes to the African continent, it is, of course, on the front lines of the climate crisis, but it’s not on the front pages of the world’s newspapers’.

Vanessa Nakate, Global Climate Activist, Uganda

Oaken pip, core blimey,
pearmain, orange pippin...

Can you guess what this week's challenge is about? ... choosing local fruits – apples or pears – instead of imported fruits.

How many different varieties of British-grown apples can you try? Be brave try something different?

Eating local, seasonal produce reduces carbon emissions related to growing out of season – such as heated greenhouses, cold storage units, or transportation.

 YOUNG
CLIMATE
WARRIORS

When you've completed this challenge ... Remember to hit the red button!

- Worldwide there are 7,000 varieties of apple, however most UK supermarkets sell only 10-12 varieties. Astoundingly the UK actually imports 55% of its apples!!
- The UK 'start of the harvest' is now almost a whole month earlier than it was 60 years ago.
- Climate change is having devastating impacts on African harvests. Learn how this World Food Programme project is bringing degraded land back to life - Greening the Sahel: Healthy eco-systems for healthy diets

CHOOSE
LOCAL OVER
IMPORTS!

Swap imported fruits for
local, seasonal fruits like
apples, blackcurrants
and pears!

Things to think about

How many different varieties of British-grown apples do you know?

What is your favourite variety?

What other fruits are grown in the UK at this time of year?

How does eating local seasonal fruit help combat climate change?

How do trees, including apple trees, help combat climate change?

How can climate change have an impact on harvests, including British apples?
