

Young Climate Warriors

How did the Recycling Challenge go?

What items did you recycle?

Did you find some old cables?

‘WHAT YOU DO MAKES A DIFFERENCE, and you have to decide what kind of a difference you want to make’

Dame Jane Goodall, Primatologist and Anthropologist

Don't just 'stand-by' ...
take action &
then 'share it'!

Little glowing eyes follow you in the dark ... as you leave the room at night as you leave to go to school ... they just carry on glowing. Can you guess what these energy-sucking vampires are?

Hunt down all little red or green eyes - count how many you find - and then switch them off (checking with your parent/carer first!).

Don't just 'stand-by', take action! Send us photos of 'vampire eyes' - and tell us how many vampires you have slain!
hello@youngclimatewarriors.org

Stand-by challenge!

When you've completed this challenge ... Remember to hit the red button!

- 'Vampire power' can account for over 10% of total home electricity use.
- 77 million appliances are left on, or on standby every day in the UK.
- Games consoles still consume energy – even when they're in 'idle' mode!
- It's time to SWITCH OFF and let your voice be heard by emailing hello@youngclimatewarriors.org!

Things to think about

How do you think we are helping our planet by switching off those 'energy-sucking vampires'?

Do you think it's 'convenient' to have appliances on stand-by?

Do you **need** to have them ready at a moment's notice?

Dr. Jane Goodall, world-renowned chimpanzee expert, now 90, continues to inspire hope globally.

Her four reasons for hope:

- 1) Human intellect
- 2) Nature's resilience
- 3) The power of young people
- 4) The indomitable human spirit.

Do you agree?

Find out more about Jane [here](#)!
